JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

A Proposal to Noblemen, Gentlemen and others, who are willing to subscribe towards Dr. Morison's New Universal Herbal, ordering Plants according to a new and true Method, never published heretofore.

WHereas *Robert Morison* Dr. of Physick, Botanick to his Majesty, and Professor of that Science in the University of *Oxford*, hath, by his assiduous and long observation, discover'd a more easie and Scientificall Method of knowing *Plants* out of the *Book of Nature*, according to the different forms of their *Flowers*, *Seeds*, and *Seed-pods*, than hath ever yet been published; whereof he hath lately (to the great satisfaction of the Learned, both at home and abroad) given an *Essay* in one of the most difficult *Classes*: And being now desirous, for the advancing and facilitating that part of *Natural History*, which hath hitherto been so tedious and discouraging to Students of that Science, for the honor of this our famous Island, and for the Increase of Learning, chiefly in the Universities of *Oxford* and *Cambridge*, with all possible speed to finish and put out the whole Work; which, by reason of the excessive charge of *Designing*, *Graving*, and *Printing*, he is not able to perform without the assistance of such Noblemen and Gentlemen, as are desirous to further and encourage this great Work: He therefore doth hereby engage to Noblemen and Gentlemen, or others, who shall be pleased to favour him with one Plate of five pounds, that an Honourable memorial shall be made of them, by engraving their Coat of Arms on their respective Plates (as is already done to others in the foremention'd Essay, as likewise in an hundred Plates and upward, of the five Sections now in hand;) and that a Book shall be deliver'd to each of them consisting of the said five compleat Sections, making 116 Plates cut in *Taille donce*, containing 1450 Plants, together with their Doctrine, according to his new and truly modelled Method: And at the paying down their five pounds, each one shall receive one of his Specimens *Umbellarum*, &c. together with a Receipt under the Proposer's hand, obliging him to furnish to each Subscriber or his Assigns the afore said five Sections complete, with their Doctrine, they furnishing him with their Coat of Arms blazoned, to be engraven under their respective Coats, And we, whose Names are hereto subscribed, do hereby engage our selves to the said *Robert Morison*, to pay, upon demand, towards this Work, each of us, the sum of five pounds for one Plate.

The Author finding, that he hath employed almost three years in engraving 108 Plates, the first two years carrying on the Work but slowly, and that partly for want of good and diligent Gravers; and now this last year, finding some Strangers both diligent and able, who joyned with some Artists of our own, we now want only the encouragement of Subscribers, for paying the Painters and Gravers, to finish the whole Work in as short a time as can be possibly allowed: Which makes us earnestly wish, that other Noblemen and Gentlemen, who have not subscribed as yet, would follow the Example of those that have done so and paid; and their respective Coats shall be engraved with the others.

Besides, the Proposer herewith signifies to all those that have subscribed to this Work, and have paid their money, that though he hath already 108 Plates (of the five Sections to be deliver'd) engraven, yet he wants the payment of 20 Plates from so many Subscribers; and that he goes on with the Gravers; but that those who have subscribed long ago, and have not as yet paid, are the cause why the five Sections are not finish'd ere now: Wherefore they are desired to pay in their money with all speed, (as others have done,) according to their Subscriptions.

The five Sections are these.

Prima Sectio continet Scandentes Rasciferas Edules & non Edules; Scandentes Lactescentes Campanulatas seu Convolutas; Scandentes Pomiferas Edules & Purgantes. Componit Tabb. 6.

Secunda continet Legumina seu Siliquosas Papilionaceas Bicafulares, & legumina Trifoliata seu Trifolia leguminosa; Tabulis 20.

Tertia continet Siliquosas & Siliculosas Tetrapetalas Bicafulares; Tabb. 24

Quarta continet Tricafulares Hexapetalas; Tabulis 28.

Quinta continet Tricafulares Lactescentes Campanulatas, Corniculatas & Galeatas; Tricafulares Pentapetalas; Bicafulares Monopetalas; & Bicafulares cum rictu anteriore, sine calvari & cum calvari, posteriori; Pentapetalas quinque-capsulares; Pentapetalas seminibus orbiculatis cingentibus stilum nutritivum; Pentapetalas Unicafulares; Plantas flore herbaceo praeditas semine triquetro, & semine lucido nigro; Tabulis 34.

Errata left uncorrected in *Numb.* 113.

p. 302. l. 43. dele colon after fruit, and place it after, the *Sium* le & *ndre*; and then read on thus, *He*, and the French *Gardiner*. p. 303. l. 22. r. in all perfection, all the year. p. 304. l. 6. instead of further, read, Here I am plunged. Our Author, it seems, having, &c. *ibid.* l. 36. r. reprinted 1655.

London, Printed for J. Martyn Printer to the Royal Society. 1675.
